

CERTIFICATE OF VOLATILITY

Marvin Test Solutions, Inc. certifies that the following product family, **GX7100 Series 3U/ 6U PXI Master Chassis** which includes the items below,

- **GX7100x**
- **GX7100x-ESATA**
- **GX7100xR**
- **GX7100xR-HP1**
- **GX7102x**
- **GX7102x-5TB**

may contain internal or on-board memory, does not retain any data or information on these devices. Users can not write directly to the non-volatile memory and that memory is used by the product for configuration information. Any additional product configuration data that may have been changed by the controlling program is erased once the power has been turned off. However, data is retained on the Hard Drive or DVD-RW and users can write to these devices. MTS offers removable hard drives for those applications that do not allow any permanent storage.

Should you have further questions about memory requirements or require a declaration of volatility, please contact our Customer Technical Services Team at 1-888-837-8297 or 1-949-263-2222.
